56th Ann. Scientific Mtg.
Nov. 2-7, Orlando, FL
www.cytopathology.org

Soc. for Neuroscience
Nov. 15-19, Washington, DC
www.sfn.org
Instructions to Authors

Scope of Submitted Manuscripts

Manuscripts will be considered for publication that deal mainly with the curative aspects of disease, and that provide new concepts where warranted. Conflicting points of view are to be presented objectively in good perspective. Discussions in the field may be pointed out and comments for further work may be included. The usual length ranges between 6 and 12 printed pages, corresponding to about 24 to 36 manuscript pages. Diagrams, tables, and illustrations should be included to bring out new concepts and important relationships. The Editor reserves the right to further develop graphics for the article. All review article manuscripts will be peer-reviewed and edited prior to publication.

Submission of Manuscripts

Submit three (3) signed hard copies of each manuscript (including illustrations) as well as an electronic version to:

Dr. Harry B. Smith, Editor
Molecular Interventions
ASPET
WSF 206-3935
Bethesda, MD 20814-3995

Electronic submission of PDF or PostScript files are acceptable. Microsoft Word preferred. Authors preparing distance on Macintosh computers should not use the Fast Save option. Other formats and files in DVI can be used, but are not encouraged. Authors are requested to supply a digital copy of their illustration. Image files should be submitted as a pdf file. All illustrations should be sent as glossy photographs, original India-ink drawings, or digitized photographs as a CD-ROM. Letters typesizes after reduction should be 6–8 points. Do not use varying letter typesizes on a page. Manuscripts should be double-spaced throughout, including references, tables, and figure legends. Manuscripts should be written in English. Authors are encouraged to submit images to be considered for possible publication.

Abstract. The abstract should be approximately 100 words and should provide the reader with an overview of the article submitted. The abstract should begin with the subject of the review and state the conclusions drawn. Abbreviations, Drug Names, Gene Names, Etc.

Abbreviations, Drug Names, Gene Names, Etc.

The following abbreviations should be used:

Molecular Interventions

All abbreviations and technical nomenclature should be explained in parentheses upon first use in the text. Generic drug names are used in text, tables, and figures. Trade names may be used in parentheses following the first use in the text. Drug names are capitalized, generic or chemical names are not.

References

References are cited in the text by number. In the reference list, the reference should conform to the AMA style, except that in vivo references are not italicized. The names of all authors should be given in the reference list. Abbreviations for journals should conform to the List of Serials in Biological Abstracts. Philadelphia, PA (1993). References to personal communications, unpublished observations, and papers submitted for publication are given in parentheses at the appropriate location in the text, not in the list of references. Only papers that have been officially accepted for publication may be cited as ‘in press’ in the reference list. Authors are responsible for the accuracy of the references. The list for each journal article, chapter, and book reference is as follows:

4. Table. Each table must be on a separate page. The tables are numbered consecutively with Arabic numerals, and typed or printed in double-column format. A brief descriptive title is provided at the top of each table. General instructions about the table follow in a one-paragraph form. Footnotes to tables are referenced by lowercase, superscript letters (a, b, c, etc.) and placed below the table.
5. Figures. Figures should be numbered consecutively with Arabic numerals, with each one displayed on a separate page. Legends must provide sufficient explanation for the reader to understand the figure independently of the text.
6. Authors. All authors are encouraged to submit images to be considered for possible publication.
