Clinical Presentation and Histologic Findings at Ileocolonoscopy in Children with Autistic Spectrum Disorder and Chronic Gastrointestinal Symptoms

Dr A.J. Russo

Editor in Chief, Autism Insights

This expression of concern relates to Clinical Presentation and Histologic Findings at Ileocolonoscopy in Children with Autistic Spectrum Disorder and Chronic Gastrointestinal Symptoms, Autism Insights 2010:2 1–11 and involves the validity of Dr Wakefield’s claim of the findings of autistic enterocolitis in autistic patients.

While the paper this expression of concern relates to is not co-authored by Dr Wakefield, the paper references Dr Wakefield’s retracted paper:

Wakefield AJ, Murch SH, Anthony A, Linnell, Casson DM, Malik M, et al. Ileal lymphoid nodular hyperplasia, non-specific colitis, and pervasive developmental disorder in children. Lancet 1998;351:637–41 [retracted].

Editors of the Lancet. Retraction: ileal lymphoid nodular hyperplasia, non-specific colitis, and pervasive developmental disorder in children. Lancet 2010;375:445.

It is considered appropriate to indicate that the paper this expression of concern relates to was subject blind peer review by two peer reviewers prior to being determined suitable for publication.

Autism Insights 2011:3 1
